

Catching the bus

When practicing our road safety awareness we have to walk with a buddy two behind two and away from the road.

We haven't got a zebra crossing anywhere on the road near to our school so this is our safe place to stop and cross.

This is our safe place to cross which is about 100 metres from our school (so our teacher says) it is safer to cross here because we can cross and stop at the middle first before we have a look and cross to the other side.

If we cross right outside our school it takes a very long time because it is a very busy road. We have to stand right back from the curb and keep looking both ways because the cars come past fast.
